Digest

Broad Commodity Mix Keeps Export Value Steady (see p. 2). Offsetting changes among the broad mix of commodities exported by the United States kept the total value of U.S. agricultural exports at $33.3 billion during the first 9 months of FY 1993, virtually unchanged from a year earlier. Lower corn prices and reduced shipments of cotton and sorghum more than offset tonnage gains for wheat, corn, and soybean exports. As a result, the value of bulk products fell slightly, offsetting most of the slight gain in exports of high-value products.

Agricultural Imports Up 4 Percent From a Year Ago (see p. 6). U.S. agricultural imports for October 1992-June 1993 reached $18.8 billion as a result of expanding imports of competitive products. Competitive imports rose by 7 percent over last year, due to strong growth in cattle, fresh and frozen vegetables, unmanufactured tobacco, and vegetable oil during the first three quarters of FY 1993. Declines occurred in fruit juice and beef shipments and in noncompetitive product imports, which fell by 5 percent on lower valued shipments of coffee and cocoa.

Broad Commodity Mix Keeps Export Value Steady

Offsetting changes among the broad mix of commodities exported by the United States kept the total value of U.S. agricultural exports at $33.3 billion during the first 9 months of FY 1993, virtually unchanged from a year earlier. Lower corn prices and reduced shipments of cotton and sorghum more than offset tonnage gains for wheat, corn, and soybean exports. As a result, the value of bulk products fell slightly, offsetting most of the slight gain in exports of high-value products (HVP's).

Even HVP's experienced some offsetting changes, a departure from the widespread HVP gains since the mid-1980's. For example, beef exports rose 5 percent to $1.5 billion, but this slight gain was spurred by a surge in shipments to Japan as the ad valorem tariff on imported beef there dropped from 60 percent to 50 percent. This upturn was largely offset by a drop in beef exports to Mexico, which increased trade barriers, and by a drop in shipments to Korea as progress toward beef trade liberalization slowed and, to some extent, reversed.

Exports of horticultural products rose slightly as weakening fruit and nut exports balanced out rising vegetable exports. A rebounding fruit harvest in Europe and sluggish economic growth in Europe and Japan helped drive U.S. fruit exports down. The volume of fruit exports to Canada rose, but a large U.S. crop meant lower prices compared with the year before, and the value of exports to Canada fell despite volume gains. Among the largest declines in fruit exports were a $48-million decline in apple exports to Western Europe and a $34-million decline in grapefruit exports to Japan.

Vegetable exports rose $273 million in 1993, a 12-percent gain to $2.4 billion. Fresh vegetable exports increased to virtually every destination except Japan, and highly processed vegetables (listed in the tables under "Other vegetables - prepared or preserved") rose even more rapidly. Highly processed vegetable exports improved nearly $150 million with gains to Western Europe, Korea, and Taiwan especially prominent.

A decline in the value of bulk product exports in 1993 is traced to lower corn prices, reduced sorghum prices and shipments, and declining cotton shipments. Last year's record U.S. corn crop drove world supplies sharply higher, and prices fell as a result. During the first 9 months of FY 1993, the average price per ton of U.S. corn exports was $101 compared with $115 a year earlier. Even with a 12-percent increase in the volume of corn exports during 1993, lower prices meant the value of corn exports was unchanged at $3.4 billion.

Sorghum prices and volume fell. Mexico's sorghum purchases from the United States slipped after a record corn crop in Mexico last year that permitted increased use of corn for feed in Mexico. U.S. exports of sorghum to Mexico fell during 1993 by 800,000 tons to 3.5 million.

Despite declines to the second and third largest U.S. feed grain customers, increases in other markets more than made up for the declines. Exports to both North Africa and Sub-Saharan Africa were higher due to poor crops in those regions. Exports to Eastern Europe were also higher as drought drove grain production from previous highs. But, perhaps most interesting, was the 1-million-ton gain in exports to Canada. In 1992, the United States actually had a deficit in its corn trade with Canada, following a particularly large corn crop in Ontario. In 1993, following a very poor corn crop in Ontario, the situation dramatically reversed.

Cotton exports fell as increased competition from other exporters cut U.S. shares in some markets, and a global economic slowdown reduced cotton imports by traditional U.S. cotton customers. U.S. cotton exports fell from 1.3 million tons in 1992 to 900,000 tons in 1993. Shipments to Southeast Asia fell from 258,000 to 128,000 tons, while shipments to Other East Asia countries fell from 332,000 to 243,000 tons. There were small gains to some nontraditional customers, such as Eastern Europe, Mexico, and Brazil. Mexico and Brazil are notable because these countries have traditionally exported cotton instead of importing it. However, strong economic growth and transformation of the industry have begun to move them to the net importer category.

Wheat exports experienced both increased export volume and higher prices. But, even these gains concealed some very large offsetting changes. In 1992, the former Soviet Union and China were by far the largest two customers for U.S. wheat. However, during the first 9 months of FY 1993,

shipments to each fell by about half. Exports to the former Soviet Union fell from 7.2 million tons to 3.6 million tons, while exports to China fell from 4.2 to 2.1 million tons.

Despite a 5.7-million-ton decline in exports to its two largest customers, U.S. wheat exports rose during the first 9 months of FY 1993, from 26.6 million to 27.7 million tons. Reduced availability of milling-quality wheat from Canada--and, to a lesser extent, from Australia--helped U.S. exports to other markets rise. Also, reduced production in a number of countries resulted in further additional sales opportunities for the United States.

Wheat shipments to North Africa rose 1.4 million tons in part due to a drought-reduced crop in Morocco. Shipments to South Africa rose 575,000 tons, shipments to Eastern Europe increased nearly 490,000 tons, and shipments to South America doubled to 1.6 million tons.

But, perhaps most significant were sales to India and Nigeria. During the 1980's, U.S. wheat exports were reduced as nontraditional exporters like India and Saudi Arabia moved increasingly from net importers to become net exporters. Shipments to India rose sharply from 6,000 to 886,000 tons as India became a net importer of wheat for the first time since 1988.

Perhaps even more depressing for U.S. wheat exports was the debt crisis that enveloped the developing world during much of the 1980's, slowing their economic growth and severely contracting their imports. Nigeria was one of the countries whose imports and consumption suffered severely due to the contraction of international lending, and in 1984, Nigeria banned wheat imports in an effort to save foreign exchange for debt payment. During the first 9 months of FY 1993, the United States exported 734,000 tons of wheat to Nigeria following removal of the ban. In recent years, improving economic conditions in a number of developing countries have boosted U.S. sales of agricultural products, with Nigeria the most recent example. ***(Stephen MacDonald, Commodity and Trade Analysis Branch, 202-219-0822)***

Agricultural Imports Up 4 Percent From a Year Ago

U.S. agricultural imports for October 1992-June 1993 reached $18.8 billion as a result of expanding imports of competitive products. Competitive imports rose by 7 percent over last year, due to strong growth in cattle, fresh and frozen vegetables, unmanufactured tobacco, and vegetable oil during the first three quarters of FY 1993. Declines occurred in fruit juice and beef shipments and in noncompetitive product imports, which fell by 5 percent on lower valued shipments of coffee and cocoa.

Animal Products Rise

Imports of all animal products totaled $4.5 billion, 6 percent higher than the first 9 months of FY 1992. There were small gains in poultry and dairy products but a decline in meat imports. The primary force behind rising animal product imports was cattle shipments from Canada and Mexico.

Strong U.S. cattle prices continued to draw in slaughter cattle from Canada, and Mexico's large supply of feeder cattle has led to increased shipments to the United States. Cattle imports through June 1993 topped 2.1 million head valued at $1.1 billion. Imports were 1 million head from Canada, an increase of 17 percent from a year ago, and 1.1 million head from Mexico, up 45 percent.

Beef imports totaled $1.4 billion, a decline of 6 percent from a year ago. Beef volume was also down by 4 percent at 591,000 tons. Shipments from Australia and New Zealand fell by 20 percent and 10 percent, respectively, as beef imports were slowed by a lower quota level than last year. There was a 24-percent increase in beef imports from Canada and a 14-percent increase from Latin America. The Latin American gains were from Brazil at $51 million and Nicaragua at $34 million. Last fiscal year, just $4 million of beef came from Nicaragua. Pork imports of $491 million were 5 percent higher than a year ago. Canada was the main supplier of pork at $275 million, a gain of 8 percent, although quantity was down 1 percent. Shipments from Denmark slipped 1 percent in value but rose 6 percent in volume.

Horticultural Products Gain Slightly

Horticultural imports were 2 percent higher than a year earlier, but vegetable and tree nut imports were up 17 percent and 23 percent, respectively. Lower fruit juice shipments and unchanged fruit imports limited the overall rise in horticultural shipments.

Fresh and frozen vegetable imports of $1.1 billion were 36 percent higher than a year ago. Import volume rose 35 percent to 1.8 million tons. The large increase grew from unusually low shipments from Mexico last year when heavy rains reduced vegetable production. Vegetable imports have even surged 4 percent higher than the FY 1990 record high of $1.2 billion, with substantial gains from Mexico in broccoli, cauliflower, tomatoes, cucumbers, peppers, and squash. Potato imports from Canada increased 78 percent from a year earlier in response to higher U.S. prices in 1993.

Tree nut imports totaled over $381 million, an increase of 23 percent from a year ago. The largest gain was in pecan imports from Mexico, totaling $71 million compared with $37 million at this time last year. Cashew nuts were the highest valued and volume tree nut imported. The value of shipments from India rose to $192 million, but fell from Latin American and African sources.

Fruit juice imports dropped $200 million from a year earlier. The value of apple juice imports was down 33 percent, and the value of orange juice imports was off 52 percent, although the volume did not fall as much. High supplies dampened import prices by 25 percent for apple juice and 46 percent for orange juice, lowering import value. Grape juice imports were the only fruit juice to increase this fiscal year. Shipments rose 23 percent to over 1.1 million hectoliters, with most of the gain coming from Sweden.

Total fruit imports declined by 3 percent to $1.2 billion, and fresh fruit imports were unchanged at $790 million compared with a year ago. Fresh grape imports from Chile were up 9 percent, but lower peach, avocado, and berry shipments slowed Chile's rise to just 2 percent more than last year. Prepared fruit shipments were 10 percent below a year ago as canned pineapple imports from Thailand fell 16 percent.

Vegetable Oil Up

Vegetable oil imports gained 16 percent to $755 million on gains in coconut oil, olive oil, and rapeseed oil. Coconut oil imports rose 28 percent from the Philippines and 134 percent from

Indonesia. A huge increase in cottonseed oil imports, almost all from Brazil, pushed volume from 98 tons last year to nearly 14,700 tons this year, as low domestic supplies raised prices and pulled in imports.

Tobacco Imports Surge

Unmanufactured tobacco imports totaled over $951 million through June 1993, a 62-percent increase over a year ago. Tobacco volume also rose over 72 percent to 317,000 tons. During the last quarter of FY 1992, there were record tobacco imports, but the current large year-to-year upturn should slow substantially through the last quarter of FY 1993. Tobacco manufacturers switched to using lower valued foreign leaf tobacco in low-end cigarettes, fueling demand for imports. Latin America has replaced Asia, including the Middle East, as the leading source of unmanufactured tobacco in FY 1993. The value of imports from Brazil surged by over 100 percent on a volume basis to be the leading source of tobacco this fiscal year at 70,000 tons. Imports from Turkey still led premium tobacco shipments at over $231 million compared with $212 million from Brazil. Overall tobacco volume from Turkey, however, was up just 2 percent at 47,000 tons. Turkey's tobacco import unit value was nearly $1,850 higher than tobacco from Brazil. Imports have also increased substantially from year-ago levels for Thailand, Malawi, and Zimbabwe.

Noncompetitive Imports Below Last Year

Noncompetitive imports were 5 percent below last year's level due to large drops in the value of coffee and cocoa. The drop in coffee and cocoa reduced agricultural imports from South America and Africa. Coffee imports totaled $1.2 billion, 19 percent below last year. Cocoa fell to $771 million, down 11 percent. Import volumes did not fall as much, 9 percent for coffee, and 3 percent for cocoa. World prices have remained low through FY 1993 as high supplies in consumer countries dampened prices. Banana imports rose 2 percent by volume, but lower prices dropped the total import value by 1 percent. Rubber, essential oils, and crude natural drug imports were ahead of last year's level. ***(Joel Greene, Commodity and Trade Analysis Branch, 202-219-0822)***

SUMMARY OF REPORT

EC Trade Reform and Livestock Feed Market Affect Ethanol Production

Number 28, July 1993

Contact: Margot Anderson, (202) 219-0449

The profitability of ethanol depends not only on sales of ethanol but on sales of coproducts of corn wet-milling such as corn gluten feed (CGF). CGF demand and supply are affected by several European Community (EC) and U.S. policies, such as EC grain price supports and U.S. energy policies. Changes in existing policies and programs could have a significant effect on the CGF market and, consequently, on the profitability of ethanol production.

A new report by USDA's Economic Research Service, *Ethanol Production, Corn Gluten Feed, and EC Trade*, examines the implications of several policy options on demand, supply, and price of CGF and on the profitability of ethanol production.

In the near term, the CGF market will likely be affected by both price reforms in the EC and an increase in ethanol production. In May 1992, the EC adopted a package of CAP (Common Agricultural Policy) reforms. The reforms, which will be phased in over time, will lower EC support prices and establish acreage set-aside requirements. By 1995, the Clean Air Act could result in 2 billion gallons of ethanol production per year, increasing CGF supply 15 percent over its level otherwise (9.1 million tons compared with 7.9 million tons).

A reduction in EC grain prices would increase the use of EC grains in EC feed rations, reduce the demand for CGF, and lower CGF prices. An increase in ethanol production also puts downward pressure on CGF price. However, increased ethanol production raises corn prices. Because CGF price is not likely to fall below the U.S. corn price, the increase in ethanol production helps cushion the fall in CGF prices. The net effect of CAP reform and expanded ethanol production is lower CGF prices, increased use of CGF in the United States, and substitution of grains for some CGF in the EC.

The United States is the world's leading supplier of CGF, a byproduct of ethanol and high-fructose corn syrup (HFCS) production. Total CGF production in the United States increased from about 2 million tons in 1975 to 6.8 million tons in 1990. Ethanol production accounted for about 2 percent of total CGF production in 1980, and about 25 percent in 1990. Most of the remainder of CGF is supplied through HFCS production.
